

How to Setup QSchools on a Phone

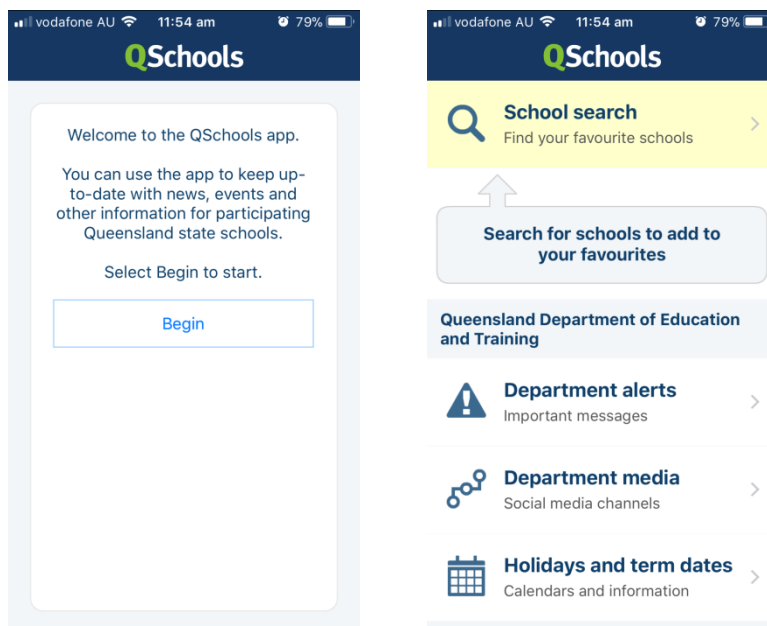

PLEASE NOTE

You NEED to be connected to a WiFi network to open QSchools for the first time. Please make sure you're connected to your home internet before beginning.

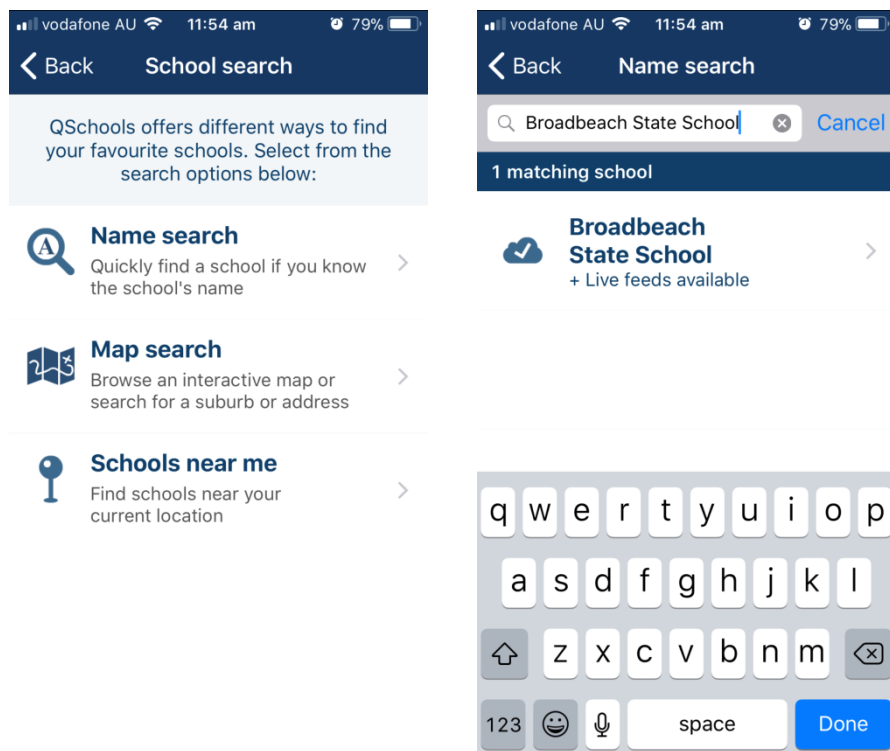

1. Go to your respective app store, search **QSchools** and download the app

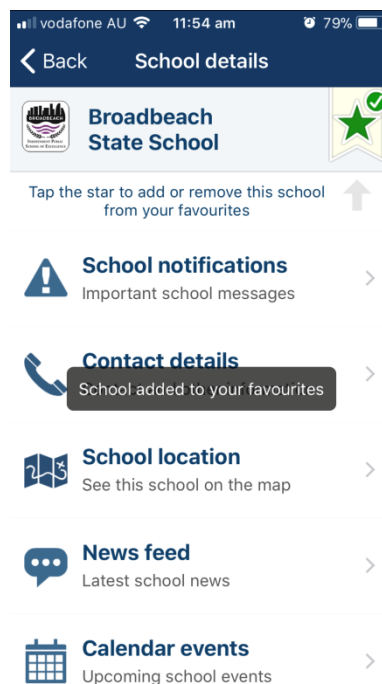

2. Tap on **'Begin'** and next tap the highlighted **'School Search'** at the top of the app

3. Tap 'Name Search' and type in the name of the school you wish to connect with.

5. Tap the school name to open it, look to the top right hand corner and tap the star. This will favourite the school so it appears on the QSchools frontpage.

From here out you can check the schools news feed, upcoming events, newsletters, reports and forms. If you have any issues please contact your respective technical team or call 1800 680 445.
